

# BLOCKCHAIN ADS

TOKENOMICS

# BLOCKCHAIN-ADS TOKEN (XADS)

The maximum total supply is 1 Billion \$XADS tokens, with that limit never being adjusted upward.

\$XADS is a deflationary **token** so when demand increases, supply does not.

## Utility of the Token

**All the payments and transactions in the platform are made solely with the XADS token.**

- The Payment module has incorporated an Exchange mechanism that currently allows deposit from 40 different popular cryptocurrencies to be converted to XADS and added to the users advertising accounts, using a third party tool.
- In the future a direct exchange and bridge plugin will be added that will allow users to also sell XADS directly from the Blockchain-ads platform.

## Self-Generating Revenue Streams

- **Blockchain-Ads fee** that is held from all the platform transactions.
  - Every time an Advertiser pays the Publishers (payment done every hour),
  - Every time the Publishers withdraw their tokens,
  - Every time a User withdraw their tokens earned from Ad Views,the Platform holds 1% of the amount and sends to the Revenue XADS Address.

- **Added Revenue Components.** In the future, Blockchain-Ads EcoSystem will deploy Native, Social, Search, and Direct Advertising, which covers all aspects of the digital advertising formats and channels.
- **Partnerships and sponsorships.** Many projects are already eager to distribute rewards and tokens to the Blockchain-ads economy. So far, few DeFi protocols and NFT Marketplaces have expressed interest to do token drops, to be used as rewards and incentives for high authority and quality publishers to join the Blockchain-Ads Ad platform. This will allow the projects to advertise their products and protocols using those publishers in decentralized manner through Blockchain-ads P2P platform.

## The revenue share will be as follows:

- 60% is sent to the Community Fund - distributed only among the accounts staking XADS
- 35% is sent to the EcoSystem Fund
- 5% is used for liquidity, buyback and burn wallet

# BLOCKCHAIN-ADS ECOSYSTEM

## Sustainability

Blockchain-ads P2P ad platform is profitable from the start as it bears no expenses.

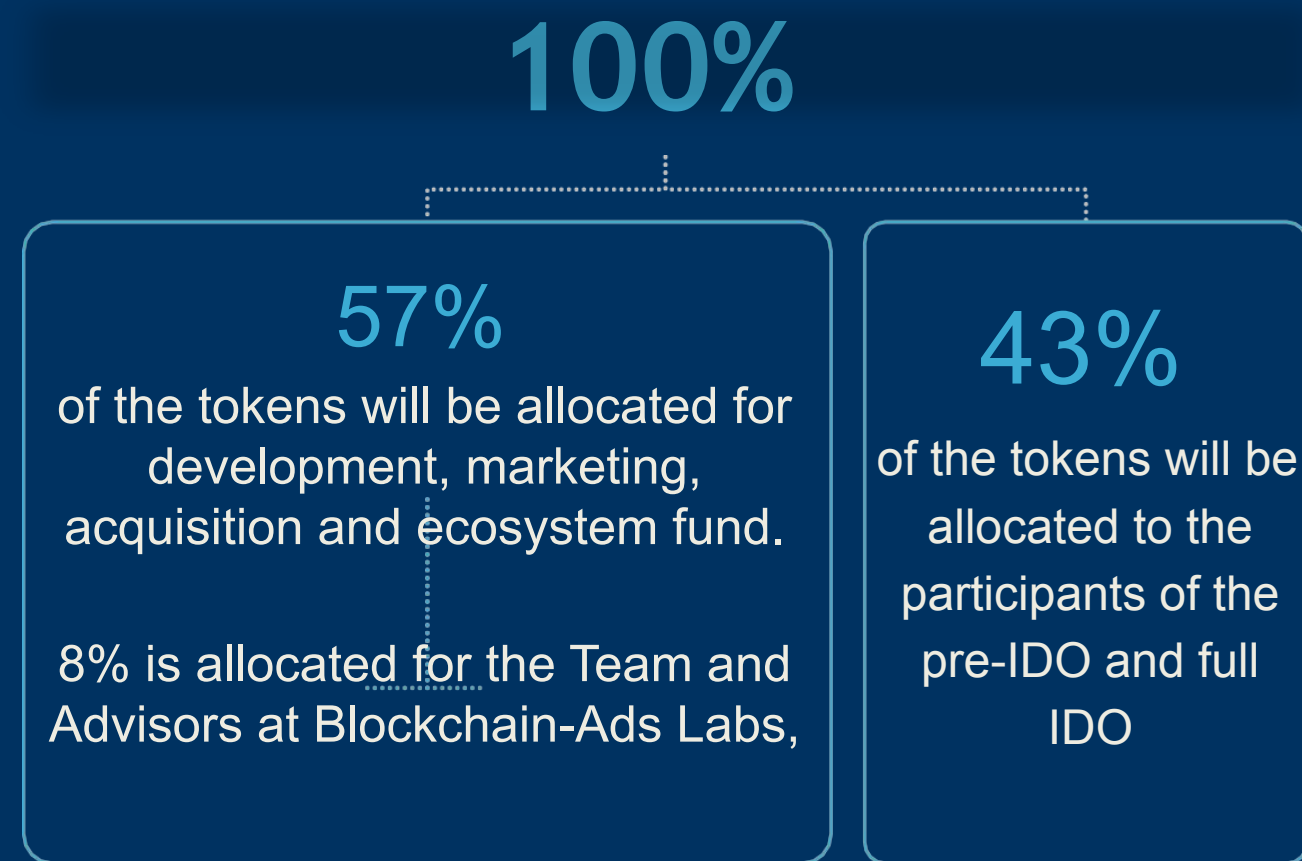

- 35% from the revenue stream goes to the EcoSystem fund that is used for rewards. That allows self-sustainability.
- On top of that, 8% from the total supply is allocated for the EcoSystem providing higher rewards for the early adopters. The early adopter Rewards will be distributed in the scalability phase, which allows faster adoption and scale the usage of the Blockchain-ads EcoSystem.

### EcoSystem Rewards

- **Publishers** are rewarded based on the quality of their Web Traffic. The highest quality traffic websites (Top 100 performing websites), will get yearly rewards on top of normal earnings.
- **Advertisers** are rewarded based on their AdSpend. The advertisers with the highest ad spend, not less than USD \$1M per year, will get yearly rewards.
- **Users** are rewarded based on their engagement rate. Users with the highest engagement, calculated based on the ad preferences/ad view/ad clicks will get yearly rewards.

EcoSystem Rewards Distribution	Year 1	Year 2	Year 3	Year 4	Year 5
Publishers	70%	60%	50%	40%	30%
Advertisers	20%	25%	30%	25%	20%
Users	10%	15%	20%	35%	50%

# BLOCKCHAIN-ADS SUPPLY & REWARD MODEL

**Supply of Tokens** Supply of tokens will consistently dwindle as more advertisers and businesses come on to the platform and overall circulation increases. Some tokens will be locked up in staking pools. The supply is limited to 1 billion.

## Performance Rewards

- **Rewards on successful verification:**  
On joining the **Blockchain-Ads platform**, participants will be awarded XADS tokens as an incentive for successfully verifying their credentials like Ad Inventories, creatives, and websites domains, ensuring high quality publishers and with that high quality traffic on our platform.
- **Marketing rewards:**  
To encourage the growth of the network and create ongoing revenue streams for contributors, successful referrals of businesses and individuals as advertisers/publishers/users to the Blockchain-Ads platform will entitle the referring party to XADS tokens.

## Staking Rewards

### 1. Rewards Pool - Unbound period 90 days

- Staking rewards,
- Community fund rewards - Blockchain-ads share the revenue fund rewards proportionally among the accounts that are staking XADS.

### 2. Rewards Loyalty Pool - No unbound period

- Staking rewards,
- Community fund rewards - Blockchain-ads share the revenue fund rewards proportionally among the accounts that are staking XADS.
- Loyalty is a staking model with 10% fees on entry and exit. All fees are distributed among the pool participants on top of compounded rewards and rewards shares

# BLOCKCHAIN-ADS TOKEN DISTRIBUTION

Participants in Pre-Sale and IDO will have a lock-up period with a 25% immediate vesting upon launch and the other 75% released over the next 9 months in equal amounts.

## IDO

**Accepted currencies:** Stable coins

**Token prices will be as follows:**

**Pre-Sale: \$0.009**

**Public Sale: \$0.012**

**Bonus:** Time - and commitment - based bonus structure.  
During the Seed stage there is 33% discount.

Round	Tokens	Price	To Be Raised	Starting Circulation	Starting Market Cap
Seed	110,000,000	\$ 0.006	\$ 660,000	35,000,000	\$ 440,000
Private Sale	170,000,000	\$ 0.009	\$ 1,530,000	42,500,000	\$ 680,000
Public Sale	30,000,000	\$ 0.012	\$ 360,000	7,500,000	\$ 120,000
Listing Pool	120,000,000	\$ 0.016	\$ (480,000)	30,000,000	
<b>TOTAL</b>	<b>430,000,000</b>		<b>2,070,000</b>	<b>107,500,000</b>	<b>1,240,000</b>

# VESTING SCHEDULE

	TGE		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25

EcoSystem and Partnerships	0%	Linear vesting until month 48																										

# FUNDS DISTRIBUTION

The funds raised through Sales will be dedicated to the following activities:

- **Marketing:** As Marketing is crucial for and AdTech project that is looking to disrupt the current market, allocation will be assigned for PR activities, Paid Advertising, Organic Presence and Social Coverage and Marketing Collaborations.
- **Development:** A major portion of the funds raised will be used for the development of the Blockchain-Ads platform. The breakdown will be as follow: AdTech Development; R&D expenses; Blockchain Protocols integrations; Ad Networks and Ad Exchanges Integration; This will include the salary of the developers, server costs, platform costs, etc.
- **Growth:** Building a sales team for direct sales of the ad platform services and Business development team for developing business relations with the crypto projects. \*Advertising experts that will contribute to the growth of blockchain advertising wider adoption \* Non-Crypto Marketers and Marketing agencies that are ideal potential users
- **Liquidity:** Funds needed to provide liquidity in exchanges.
